CITY ELECTRICIAN

Department:	Public Works - Facilities	Pay Grade:	M
Bargaining Unit:	Teamsters	FLSA Status:	Non-Exempt
Revised Date:	June 2013	Reports To:	Facilities Manager

POSITION PURPOSE: Under general supervision, performs services of a state-licensed electrician for the City facilities including traffic signals and installations such as lift stations; researches requirements; generates estimates; installs new power circuits and repairs existing equipment per the electrical code; tests and certifies fire alarm systems throughout City buildings; performs routine maintenance and repairs for HVAC control systems including initialization and scheduling or setting changes.

ESSENTIAL FUNCTIONS AND RESPONSIBILITIES:

*The following duties **ARE NOT** intended to serve as a comprehensive list of all duties performed by all employees in this classification, only a representative summary of the primary duties and responsibilities. Incumbent(s) may not be required to perform all duties listed and may be required to perform additional, position-specific duties.*

- Performs skilled state-licensed electrician services for City facilities; performs installation of new electrical service and adds circuitry to existing services.
- Repairs and maintains existing facilities and equipment including: testing, troubleshooting, diagnosis and repairs.
- Provides assistance to other departments or divisions in the maintenance, repair and upgrading of their equipment.
- Performs programming work associated with control systems including: electronic controllers, microprocessors and the modification and upgrade of control cabinets.
- Repairs electrical and mechanical controllers; installs conduits, wires, junction boxes, switchboards and controllers.
- Interprets blueprints, sketches, and other instructions; performs testing and certification of fire alarm systems, sprinkler systems and other related systems as scheduled or required.
- Performs skilled mechanical maintenance duties in the installation, maintenance, repair and alteration of City heating, ventilation, and air conditioning systems, control devices and related equipment.
- Tests for proper HVAC system equipment function; performs calculations, inspects, troubleshoots and repairs or replaces malfunctions in sensor units.
- Communicates with others regarding research, purchase and installation of equipment.
- Participates in safety meetings and other meetings and training as required or scheduled; completes continuing education courses for maintenance and renewal of state electrical license and signal technician certification.

Required Knowledge of:

- Electrical code and application to installations, both new and existing.
- Programming and control schemes for traffic signals, HVAC software and lift station operations.
- Operation and repair of HVAC systems.

JOB DESCRIPTION

City Electrician
